

## ENVIRONMENTAL SERVICES

DALLASWHITE's Environmental Services include abatement and remediation of:

- Asbestos ·Chemicals ·Chinese Drywall ·Lead Base Painted Materials ·Microbial Contaminants
- Mold/Mildew ·Sewage

Exploratory & Preliminary Testing:

Our certified hygienists will test your property to determine if there are hazardous materials that require environmental remediation. If it is determined that hazardous materials are present, our certified hygienists will develop a protocol for the abatement and remediation of the hazardous materials that complies with local, state, federal, and OSHA regulations.

Abatement & Remediation:

Our certified technicians will set containment, remediate, and dispose of all hazardous materials according to the protocol developed by the hygienists. Using state of the art air scrubbers, dehumidifiers, disinfectants, HEPA vacuums, negative air machines, and sealants, according to the protocol, our technicians will ensure that your property is completely decontaminated.

Contents:

During the remediation process, your contents will be handled with the utmost care by our expert contents team. Our team will carefully document all your belongings, hand pack, transport, clean and store your personal items offsite, if necessary.
